

# Classic Amiga add-ons with Vampire compatibility

After connecting an accelerator board to a classic Amiga, it is not always guaranteed that all legacy add-ons (peripherals, expansions, etc.) will play along well with the new board.

This page contains a list of classic Amiga add-ons that have been reported as working well while a Vampire accelerator board is connected to the Amiga.

Want to see your add-on in this list? Just [get in touch](#) with us so we can review it.

| Brand       | Product                         | Remarks  |
|-------------|---------------------------------|--|
| (Various)   | Mouse/joystick adapters         |  |
| Commodore   | A2091                           | Requires 7.0 ROMs  |
| Microbotics | 8-UP!                           |  |
| iComp       | ACE2                            |  |
| iComp       | A604n                           | Working clockport expansions:<br>- RTC module<br>- Subway USB<br>- RapidRoad USB<br>- Delfina sound card |
| iComp       | A603                            | Working clockport expansions:<br>- RapidRoad USB   |
| iComp       | Indivision ECS                  | Configuration needs <a href="#">this patch</a> ; Graffiti mode not working                               |
| iComp       | Indivision ECS V2               |  |
| iComp       | Indivision AGA MK2              | Configuration needs <a href="#">this patch</a>   |
| iComp       | X-Surf                          |  |
| iComp       | X-Surf-100                      | Working expansions:<br>- RapidRoad USB   |
| iComp       | Buddha                          | Working clockport expansions:<br>- RapidRoad USB   |
| iComp       | RapidRoad USB                   |  |
| E3B         | Deneb USB                       |  |
| —           | MiniThylacine USB               |  |
| (Various)   | CompactFlash-to-PCMCIA adapters |  |
| 3Com        | EtherLink III PCMCIA            |  |
| NETGEAR     | FA411                           |  |
| NETGEAR     | MA401 WiFi                      |  |
| ORINOCO     | Gold WiFi                       |  |
| CNet        | CN40                            |  |
| Linksys     | WPC11 WiFi                      |  |
| HiSoft      | Aura sound card                 |  |

| Brand            | Product                                 | Remarks   |
|------------------|---|---|
| Alfa Data        | CD1200 controller                       |   |
| Alfa Data        | Tandem CD+IDE controller                |   |
| Alfa Data        | AT-Bus 2008                             |   |
| Alfa Data        | Oktagon 2008                            |   |
| DKB              | RapidFire                               |   |
| GVP              | Impact A4000-HC+8 (A4008)               |   |
| AmigaKit         | <a href="#">AmigaKit CF-IDE adapter</a> |   |
| Arananet         | <a href="#">Panther CF-IDE adapter</a>  |   |
| A-EON Technology | Prisma Megamix music card               |   |
| Petsoff          | Delfina Lite sound card                 |   |
| MacroSystem      | Toccata sound card                      |   |
| MacroSystem      | VLab                                    |   |
| SunRize          | AD516 sound card                        |   |
| DPS              | Personal TBC IV                         |   |
| DPS              | Personal Animation Recorder             | PAR software versions 2.50 and 2.55 have issues with hard disks |
| Village Tronic   | Ariadne Ethernet card                   |   |
| Village Tronic   | Picasso II                              |   |
| Village Tronic   | Picasso IV                              |   |
| X-Pert           | Merlin                                  |   |
| NewTek           | Video Toaster                           |   |
| NewTek           | Video Toaster 4000                      |   |
| Elbox            | FastATA 1200 MK-V                       | Works only in PIO-0 mode  |
