

# Vampire-compatible USB input devices

This page contains a list of USB input devices (mice, keyboards, game controllers, etc.) that are known to be working well on Vampire boards that have a USB port.

To initialize a USB mouse or keyboard, the Vampire uses the “boot protocol”. This is the same protocol that was used by PC BIOS USB stacks before UEFI became widespread. Nowadays, with UEFI USB stacks available on most PCs, the old “boot protocol” is no longer necessary, so some manufacturers simply omit this protocol from their mice and keyboards.

If a USB mouse or keyboard does not support the “boot protocol”, it will not work on the Vampire.

For communicating with USB game controllers, there is no standard protocol. Every manufacturer's protocol can be different. The Vampire has support for most of these protocols, covering a substantial number of game controllers.

## Mice

Brand	Product	SKU or EAN or P/N
AmigaKit	Optical Scroll Mouse USB PS2	MSEUSBOPB
AmazonBasics	3-Button USB Wired Computer Mouse, Model: MSU0939	
Dell	MS111	
HP	X1000	
HP	USB Optical Mouse	Spares P/N: 674316-001
LogiLink	ID0010	
LogiLink	ID0011	
LogiLink	ID0016	
LogiLink	ID0063	
LogiLink	ID0095	
LogiLink	ID0124	
LogiLink	ID0162	
Logitech	M90	
Logitech	M100	
Logitech	M110 Silent Mouse	
Logitech	B100	
Logitech	M-UK96A	
Logitech	MX Revolution	
Microsoft	Basic Optical Mouse v2.0, Model: 1113	
Microsoft	Compact Optical Mouse 500 v2.0, Model: 1344	
Microsoft	Optical Mouse by S+ARCK	
Lenovo	USB Optical Wheel Mouse, Model: MOEUUOA	FRU P/N: 00PH128
V7 Videoseven	USB-Mouse Optical	MV3000010-5EC

<b>Brand</b>	<b>Product</b>	<b>SKU or EAN or P/N</b>
