

Vampire 1200 V2

[Order Now](#) from the manufacturer.

[Order Now](#) from a reseller.

Accelerator board with record-breaking speed and unrivalled features.

Signature

- **Target:** Amiga 1200 (connects to the trapdoor expansion slot)
- **Designer:** [Majsta](#)
- **Manufacturer:** [Majsta](#)
- **Release Date:** Christmas 2019

Specifications

- **FPGA:** Altera Cyclone III
- **CPU:** [Apollo 68080 Core](#) ¹⁾
 - Equivalent to 1000MHz 68030 / 500MHz 68040 / 250MHz 68060 ²⁾
- **Memory:** 128 MB FastRAM
- **Chipset:** [SAGA Core](#)
- **Video:**
 - Modes up to 1280×720@60Hz, 1920×1080@24Hz
 - Color depths of 8, 15/16, 24, 32 bits per pixel
 - Hardware-accelerated video playback
- **Internal Ports:**
 - 44-pin Fast IDE Interface
 - Up to 13 MB/s data transfer speed ³⁾
 - JTAG Socket
 - Ethernet Module Connector
 - Expansion Socket
- **External Ports:**
 - Digital Video Out
 - MicroSD Card

- ¹⁾ See “Precision” under [68080 FPU Core](#) for some caveats.
- ²⁾ Exact performance is application-dependent.
- ³⁾ Speed boost depends on the highest PIO mode supported by the storage device.
